

2022 YEAR IN REVIEW

We want to thank you for your support in 2022. This year we made sure to continue our mission of bringing secure transportation and mobility in the automotive sector. See below for AUTOCRYPT's accomplishments in 2022.

'2022 Red Herring Top 100 Global'
by Red Herring magazine

'Automotive Cybersecurity Solution of the Year'
by 2022 CyberSecurity Breakthrough Awards

'Ride Hailing Innovation of the Year'
by the 2022 AutoTech Breakthrough Awards

We had some meaningful conversations and discussions with our partners and clients at international events this year.

- 2022 ITF Summit
- EVS35 Oslo

- 2022 AutoTech: Detroit
- 2022 ITS World Congress

AUTOCRYPT was officially accredited by the WebTrust program as a root CA for the V2X-PKI ecosystem.

\$120 M

AUTOCRYPT closed Series B financial round with \$25.5 million, bringing its total valuation to \$120 million.

EVIQ

In the summer, we launched **EVIQ**, an all-in-one EV information and charging platform that comprises of a charger locator map, a charging station management system (CSMS) for CPOs, a smart-billing Level 1 EV charger for residential use, and a Plug&Charge security module for secure and seamless charging.

WE LAUNCHED

AutoCrypt V2X-Air

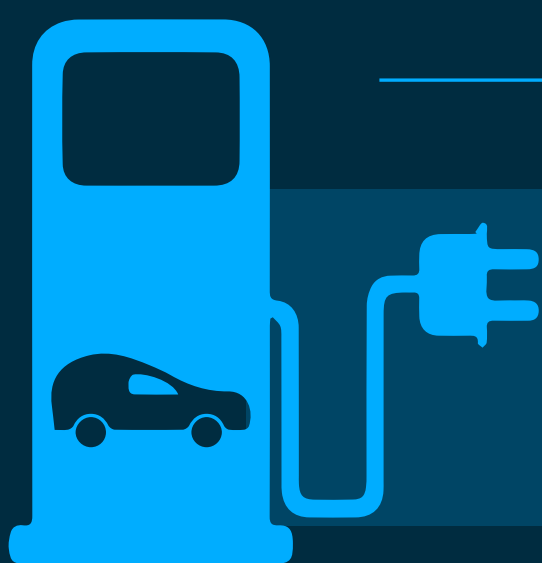

A portable OBU for vulnerable road users. V2X-Air enables pedestrians and micromobility users to easily join the V2X ecosystem.

Security Analyzer and Security Fuzzer

A set of vulnerability testing tools utilizable during any stage of the software development lifecycle, dedicated for software-defined vehicles.

Integrated Management System for SCMS

IMS for SCMS allows OEMs to view all their entire SCMS certificates on one centralized GUI.

AutoCrypt PnC was integrated into Hyundai Motor's E-pit charging service platform, an ultra-rapid EV charging network across South Korea.
